ASTECH

COMPANY PROFILE

ASTECH is one of INDIA'S quality manufacturer of Road Construction Machinery. For over 30 years we have helped Road Contractors maintain the beauty and structural integrity of their paved surfaces.

Our reputation has made us the preferred manufacturer of Road Construction Machinery since we first opened our doors.

When you work with us, you expect:

Professionalism

Persistence

Precision

Experience

Double beam screed vibrator

Double Beam Screed Vibrators are used to give a uniform flooring to the RCC flooring. The heavy weight removes any external air bubbles of the RCC flooring. The difference in superior compaction is seen by the heavy weight it eludes.

It is driven by a 1 HP motor. For the safety of motor, an electric starter is provided.

Power floater cum trowel

Power Floater cum trowel is powered by 3 HP geared motor and is used to give a superior finishing to the RCC flooring. The gear box is heavy duty and sturdy designed for rough Indian conditions. The dish used for finishing is 4mm thick and is very important to maintain a long life.

Vacuum pump

Vacuum Pump is used to suck all the air bubbles that may have trapped during the laying of the concrete. It allows the cement to come up to upper layers and hence gives a superior strength to the floor. The three mats: filter mat, suction mat and top mat, these mats do not allow cement to come up but only sucks the extra water. During working, it eludes a vacuum pressure of 400-450 mm/Hg and 650 mm/Hg when idle. It is powered by 7.5 HP motor.

Groove cutting machine

Groove Cutting machine is used when accurate and quick cutting of the concrete slab is required. The blade can cut the floor up to 100 mm. The blade used is of superior quality and is long lasting. It also has a 60 liter water tank to wet the blade during operation. It operates on a chain wheel drive and is extremely from the safety point of view. It is powered by 10 HP standard make motor.

If you're ready to experience the ASTECH difference, contact us today.
We'd love to hear from you.
